PROFILE

UX/UI designer creating manually designed Figma interfaces, user flows, wireframes, and prototypes. Combines visual design, independently studied frontend knowledge, and experience in online content presentation.

SELECTED DESIGN PROJECTS

FitHub

Product Design Concept

- Designed a coaching workspace with information architecture and role-specific desktop/mobile interfaces for client management, workouts, and nutrition.

Lexi

Interaction & Accessible Interface Concept

- Designed accessible reading controls and iterated the UI, moving secondary actions into “More Options” to prioritize reading.

Lumi

Original Mobile UX/UI Concept

- Manually designed the original mobile concept in Figma, including user flows, wireframes, interfaces, and interactive prototypes.

All design work was manually created in Figma. AI assisted only exploratory research and hypothetical user scenarios. No real user interviews or usability testing.

DESIGN SKILLS

UX & Interaction

Information architecture, user flows, wireframing, interaction design, prototyping

UI & Visual Design

Figma, layout, visual hierarchy, responsive interfaces, component-based design

Programming & Frontend

HTML, CSS, JavaScript, React

Research Approach

Exploratory research and hypothetical user scenarios, assisted by AI

JavaScript and React learned independently, without AI assistance.
